

use **structured logging** with JSON

CloudWatch Logs

\$0.50 per GB ingested

\$0.03 per GB archived per month

CloudWatch Logs

1M invocation of a 128MB function =
 $\$0.0000000208 * 1M + \$0.20 =$
 $\$0.408$

\$0.50 per GB ingested

\$0.03 per GB archived per month

DON'T leave debug logging **ON** in production

what we'll do in this module

- replace *console.log* with a JSON logger

what we'll do in this module

- replace *console.log* with a JSON logger
- allow log level to be configurable by environment
